

STRENGTHEN FAMILY ENGAGEMENT

Exciting news! The ESC Dyslexia team is launching an initiative to help school districts strengthen family engagement. We are thrilled to share two asynchronous courses designed specifically for parents to enhance their understanding and ability to support children with dyslexia and related disorders.

Course 1: Assistive Technology

Link: <https://youtu.be/vEb8B832XuQ>

This course provides practical strategies for effectively communicating with children about dyslexia and explores assistive technology tools that enhance learning accessibility and foster independence.

Course 2: Dyslexia and Related Disorders: Information for Parents

Link: <https://www.youtube.com/watch?v=iSnog8kP7VQ>

This course helps parents understand dyslexia, a specific learning disability affecting reading, writing, and spelling. It covers characteristics, diagnosis, and related disorders like dysgraphia. The importance of evaluation and identification, effective instructional strategies, and instructional accommodations and modifications is emphasized. The course provides guidance of resources to help parents support their child's educational journey.
